

BRAND & BUILD BOOK

The single source of truth for the look,
feel and front-end of the fantasy game
built by fans, for the fans.

WORLD CUP 2026 EDITION

THE IDEA

A STAR AT THE HEART OF THE ELEVEN

XI is the universal shorthand for a starting eleven. The **star** is the spark every fan chases. Fuse them and you get the whole promise in one mark — and one rule that governs everything that follows: **the experience is fast, full-screen and never messy.**

POSITIONING

Streetwear-meets-stadium. Broadcast-grade, but never stiff — pitch green and chalk do the serious work, electric lime brings the play. **Professional spine, playful soul.**

VOICE

Confident, warm, fan-first. Short lines. UPPERCASE for impact. "Pick your nation." "Made by fans, for the fans." Never corporate, never shouty.

THE GOVERNING LAW

ONE SCREEN. NO MESS.

✗ **The old way.** Stacked cards spilling far below the fold. Walls of text, mixed accents, endless scroll. The eye gets lost and the mark scrolls away.

Every step lives inside 100% of the viewport. No long scrolling pages, no stacked walls of cards. If a flow needs more room, it becomes another **paged step** with a clear **Next** — not a taller page. This is the rule the whole product is judged against.

✓ **The STAR XI way.** One contained screen. Mark centred up top, content breathing, a single primary **Next**. Everything fits — always.

THE FLOW, PAGED — EVERY STEP IS ITS OWN 100VH SCREEN

RULE 01

Design to **100vh**. If it doesn't fit, split it into another step — never make the page taller.

RULE 02

Advance with a persistent **Next / Back** pair.
One primary action per screen, bottom-anchored.

RULE 03

The **mark stays centred up top** on every step. It is the fixed anchor the whole journey hangs from.

THE ANCHOR

STAR XI LIVES IN THE CENTRE

The lockup is pinned **top-centre on every screen** and never moves. As nations flip and steps change, the mark is the one constant — the still point the experience rotates around. The hero figure owns the centre of the stage; the brand owns the crown.

SELEÇÃO

TOP-CENTRE LOCKUP · HORIZONTAL CENTRE LINE

NEVER RELOCATES

ONE MARK, EVERY STAGE

An open five-point **star** whose right edges resolve into a slanted **XI**. Chalk is the default; gold is reserved for hero and champion moments; green carries one-colour print. Never redraw — only re-arrange these approved pieces.

CONSTRUCTION

CLEAR SPACE & MINIMUM SIZE

The star's width is **1 unit (1u)**. Keep at least **1u** of clear space on every side — no type, edges or other marks enter that zone. Never crowd, rotate or recolour the mark outside the approved set.

DIGITAL MINIMUM

Full mark no smaller than **28 px** tall. Below that, switch to the favicon crop.

TINY / FAVICON

At 16–24 px keep the mark on a solid pitch tile so the star reads. Never stretch or add effects.

COLOUR

PITCH, CHALK & A SPARK

Pitch green and chalk are the foundation. Electric lime is the energy — used sparingly for the star, highlights and live states. Trophy gold marks premium and champion moments only.

PITCH GREEN

#0C8A45

Primary field. Backgrounds, fills.

DEEP PITCH

#08130D

Dark surfaces, shadow, chrome.

CHALK

#F3F1E9

All type & UI. Warm white.

ELECTRIC LIME

#C6F24E

The star. Accents, live, energy.

TROPHY GOLD

#E9B949

Premium, numbers, champions.

Nation colours. In-product the background flexes to one bold flat colour per nation, with **pure #FFFFFF** type on top for maximum contrast. The five brand colours always frame and badge that experience; the nation owns the field.

TYPOGRAPHY

ANTON + INTER

A tall condensed poster face does the shouting; a clean grotesk keeps the UI quiet and legible. Two fonts, clear jobs, no third voice.

DISPLAY — ANTON

THE GLASS LANGUAGE

One consistent kit across every screen: translucent **glass pills**, solid white primaries that pick up the nation colour, and a quiet grain over every flat field.

MAN

WOMAN

SELECT YOUR STAR XI →

GLASS PILL · SEGMENTED TOGGLE · SOLID-WHITE PRIMARY

RADIUS 999 · 2PX BORDER

GLASS PILLS

Fill `rgba(255,255,255,.12-.14)`, 2px white border, blur, fully rounded. The core UI motif.

SELECTED STATE

Active choice inverts to **solid white** with the nation colour as its text — it always picks up the field.

GRAIN

A ~40% fractal-noise overlay sits on every flat colour — kills banding, gives a printed, tactile feel.

IN THE WILD

APP, WEB & SOCIAL

The squircle app icon and circular social avatar both centre the mark on pitch green. Strip back to the tile as size drops — the mark always sits dead-centre with breathing room.

APP ICON · 1024

AVATAR · GOLD

AVATAR · GREEN

FAVICON 64

FAVICON 32

MOTION

THE MARK BREATHES

The signature sting is deliberately **sweet and simple**: a gold shimmer sweeps across the mark, it breathes once, a single spark lifts off the star — then it rests. Loops seamlessly every few seconds as an ambient sting, splash screen or stream bumper. Nothing busy, nothing that competes with play.

SHIMMER → BREATHE → SPARK → REST → LOOP

~5.6S · SEAMLESS · RESPECTS REDUCED-MOTION

EASING

Carousel & transitions: **600ms** `cubic-bezier(.4,0,.2,1)`. Calm, broadcast-grade.

PACING

Nation auto-flip ~**1.15s**. Alive, but always readable. Stops the moment a user picks.

RESTRAINT

Motion is seasoning, not the meal. Transform/opacity only; never block interaction or the one-screen rule.

BUILD WITH CLAUDE

SHIP IT CONSISTENT

Everything an AI pair-developer needs to extend STAR XI without drifting. Paste the design tokens and the system prompt below into Claude before any new screen, then check your work against the consistency list.

Senior Lead UI/UX Developer – system prompt

Paste this as Claude's role before building any new STAR XI screen.

You are the **Senior Lead UI/UX Developer** for STAR XI – the World Cup 2026 fantasy game "made by fans, for the fans." You own visual + interaction consistency across the entire experience.

NON-NEGOTIABLE LAWS

1. ONE SCREEN. Every step fits within 100vh – no long scrolling.
If content overflows, split it into another paged step with a clear Next/Back. Never make a page taller to fit more in.
2. ANCHOR. The STAR XI lockup is pinned top-centre on every screen and never moves. The hero/figure owns centre stage.
3. ONE PRIMARY ACTION per screen, bottom-anchored, as a solid-white pill that takes the nation colour as its text.

VISUAL SYSTEM

- Type: Anton (display, UPPERCASE, tight) + Inter (UI, 400-800).
Labels = Inter 700, caps, letter-spacing .14-.26em. No third font.
- Colour: pitch green + chalk foundation; lime = the star/energy/live (sparingly); gold = champion moments only. In-product the bg is one flat NATION colour with #FFFFFF type; add ~40% fractal-noise grain.
- Components: glass pills (rgba(255,255,255,.13) fill, 2px white border, blur, radius 999). Cards radius 18. Selected = invert to solid white w/ nation-colour text.
- Motion: transform/opacity only, 600ms cubic-bezier(.4,0,.2,1).
Seasoning, not the meal. Honour prefers-reduced-motion.

TONE: confident, warm, fan-first. Short lines, UPPERCASE for impact.

PROCESS: before coding, state the screen's single goal, confirm it fits 100vh, and name the one primary action. Reuse existing tokens

and components – never invent new colours, fonts or patterns. When in doubt, match Star XI.html exactly.

SHIP CHECKLIST — EVERY SCREEN PASSES ALL OF THESE

- ✓ Fits in **100vh** with no page scroll on a laptop
- ✓ Exactly **one primary action**, bottom-anchored
- ✓ Only **Anton + Inter**; labels in caps + tracking
- ✓ Type on nation fields is **#FFFFFF**
- ✓ Lime & gold used **sparingly**, on-purpose
- ✓ STAR XI mark **centred top**, untouched
- ✓ **Next / Back** paging instead of long flows
- ✓ Background is a **flat nation colour** + grain
- ✓ Buttons are **glass pills** / solid-white primary
- ✓ Motion is transform/opacity, **reduced-motion safe**
